Subject: Re: Data tonight

Team-below is the final statement for tonight. This needs to be:

1. Posted online as an update to the Gold King Mine site
2. Congressional/elected notification
3. Press release to HQ and regions
4. Please post the original data charts I sent to George Hull.

PLEASE CONFIRM WITH ME THAT YOU HAVE RECEIVED THIS INFO AND ARE PREPARED TO FULLFIL YOUR DUTY.

To assess the impacts of the release at the Gold King Mine near Silverton, Colorado, water quality samples were collected at numerous intervals beginning on Aug. 5, 2015. Samples were taken prior to the plume's arrival to establish a baseline for water quality comparisons. Each surface water sample was analyzed for 24 metals, including arsenic, cadmium, lead, and mercury.

Analysis now shows that water quality for the Animas River from the Silverton, Colo. area to the Durango municipal water intake has returned to pre-event water quality levels. These results are based on validated sampling data collected from Aug. 5 to Aug. 9, 2015.

EPA has shared this data with state, local and tribal officials in Colorado to assist them in their decisions regarding the on-going use of water resources. EPA plans to continue to monitor, analyze and share data for downstream river segments as it becomes available.

Subject: Re: Data tonight

Messaging and data are still coming for tonight.

Melissa will be sharing them shortly.

It still will need to be posted and sent out to media.

George-below is the language. This should be an easy clear with the EOC as I believe your contacts have been in the loop. I'm just waiting on the data charts in PDF.

Interpretation of Water Metal Concentrations

Deliberative Process/Ex. 5
